RESPONSE

In response to the Examiner's action dated July 10, 2002, please amend the application as follows. The amendments are presented below in clean form (i.e., without markings that indicate the changes that have been made); marked-up versions of the amendments are presented in the attached Appendix A.

In the drawings:

Please amend FIGS. 9 and 10 as shown in red in the attached amended drawing sheet. Unmarked versions of FIGS. 9 and 10 are contained in the attached formal drawing sheet.

In the specification:

At page 13, replace the paragraph beginning at line 31 with the following paragraph:

a' --Fig. 11 illustrates a print cartridge 28 sealed with a block coated hot-melt 55 on heat stakable pouch material 53. The block coating is a pattern of hot-melt coated onto a base film before the nozzle sealing process is commenced. The clock coating is a strip of hot-melt sufficiently wide to cover the width of the orifice plate 29, Fig. 6. The base film is a heat stakable pouch material. The pouch material and the hot-melt are chosen for their moisture
